## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-42 and 46-79, drawn to authentication method, classified in class 713, subclass 168.
- II. Claims 43-45, drawn to a personal transaction card, classified in class 705, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

The two inventions, authentication method and personal transaction card are disclosed as independent and distinct inventions. In the instant case, group I has separate utility such as authenticating the activity request on the non-authenticatable device. Group II has separate utility such as an ATM routing number and a mobile telephone number.

Furthermore, group I does not need particulars a personal transaction card and it can be utilized using any authenticating devices such as personal computers. Group II does not need particulars of authentication method and it can be used as an information storage device.

See MPEP § 806.04 and MPEP § 808.01.

Because these inventions are distinct for the reasons given above and the search required for the authentication method of group I is not required for a personal transaction card group II, restriction for examination purposes as indicated is proper.

Art Unit: 2134

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
